Installation Instructions

Japanese A Module Install
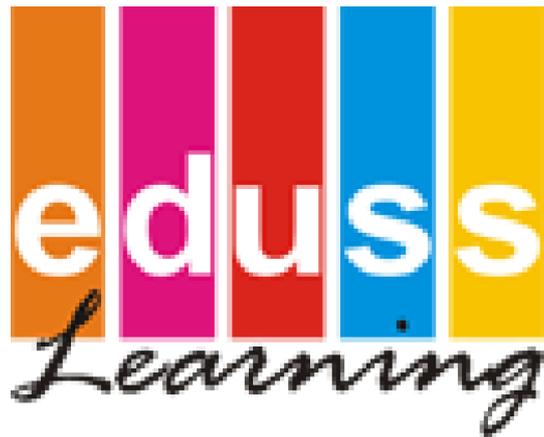

Module Install For Server

To install the modules insert the Eduss CD into the CD-ROM drive and navigate to it by going to **My Computer** and right clicking on the CD-ROM drive and selecting **Open** from the menu.

1. Once inside the CD menu double click **JapaneseAModule.exe**. The install window will open and you will need to click on **Next**.
2. The next window will show the licence agreement, which you will need to read carefully and agree to. If you do agree click **I Agree**.
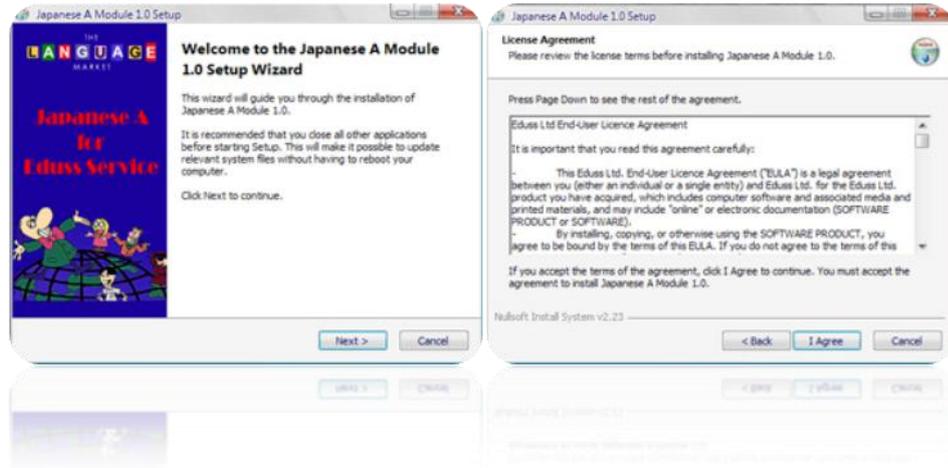

3. The program will now be installed, once it's done you will have to click **Finish** to close the installer.

Workstation Installs

Install Required Font

1. Navigate to the Eduss CD by opening **My Computer** and then right clicking on the Eduss CD and selecting **Open** from the menu.
2. Find and select the files **jml.ttf, jsys.ttf** and **TBFIXTM.TTF** (to select multiple files, hold the **Ctrl** key while selecting files)
3. Right click on one of the selected files
4. Select **Copy** from the menu.

5. Navigate to **My Computer > C:\Local Disk > Windows > Fonts**.
6. Inside the **Fonts** folder select **Edit** from the Window Menu, and then **Paste**.
7. Close the open windows, the font is now installed.

Adobe Flash Player Installation

1. To install Adobe's Flash Player Navigate to the Eduss CD by opening **My Computer** and then right clicking on the Eduss CD and selecting **Open** from the menu.
2. Double click on **install_flash_player.exe**
3. You will see a window which asks you to choose your language. Select the appropriate one and click **OK**.
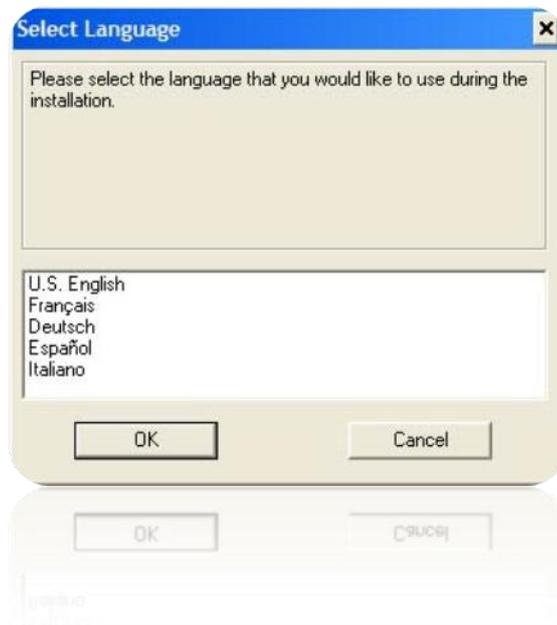

Setting Up Workstation Links

You will need to create a shortcut on each workstation desktop. You can do this one of two ways.
1. You can use this address:
   http://YOURSERVERNAME:9957/TLM/page/index.php, where **YOURSERVERNAME** is the name of the server that the Eduss software is installed on. To create the shortcut, simply right click on the Desktop and select **New** > **Shortcut**. Inside the text box past the address then click **Next**. Name the Shortcut according to the module it is linked to then click **Finish**.
2. Or, you can create a link to **TLM_NET.exe** on your server. Do this by firstly sharing the **bin** folder in **C:\Local Disk > Program Files > Eduss >Service** on your server. Then you right click the Desktop and select **New** > **Shortcut**. Browse to **TLM_NET.exe** which should be on the server in the folder **Eduss >Service >bin**.
